Press release 21/2013

2. StorageDay powered by WINAICO's energy storage system

Innovative and reliable technology convinced visitors

Creglingen, 11.11.2013 – WINAICO, a division of Taiwan's biggest module manufacturer Win Win Precision Technology Co., Ltd., completely energised the 2nd StorageDay from SolarAllianz, which was held in Berlin last Tuesday, with its new range of solar energy storage systems. Due to the WINAICO EnergyStorage 9 the event was absolutely energy self-sufficient.

The aim of the StorageDay is to provide energy storage solution ideas and direct comparisons, whereby the requirements of end customers are just as important as the technical characteristics.

"We do not only offer innovative products, but we are also active in the field of electrical energy storage. To be part of the StorageDay as speaker and supplier of storage systems is in line with our strategy which allows WINAICO to let our actions speak and to convince end users and investors with real and practical performance records", explains Eduard Karpekin, WINAICO's technical speaker at the StorageDay.

"The StorageDay is about directness. On the one hand, between protagonists - manufacturers and distributors meet installers, solar specialists and energy consultants - on the other hand, between visitors and products. What would be more obvious than to adduce evidence and to make an energy self-sufficient event out of the StorageDay?", says Andreas Muntinga, Director of SolarAllianz Network SAN GmbH. "We concluded the evening with bright lighting and loud music powered by stored energy gained throughout the day and think that this dispelled the doubts of all participants about storage solutions."

With WINAICO's EnergyStorage it is possible to store the sun's energy and to use it when you need it. The system encourages optimal energy distribution by being installed in front of the main distribution in the house and works on all three phases. Core of the WINAICO EnergyStorage is a high-tech battery cell based on the unique Kolibri solid state technology.

WINAICO – Manufacturer and system supplier

As a 100% subsidiary of the semiconductor company Win Win Precision Technology Co., Ltd., based in Taiwan, WINAICO manufactures and distributes crystalline high performance modules worldwide. Furthermore, as a systems house for photovoltaics, WINAICO delivers complete PV system packages.

Company customers are solar specialists, solar technologists, installation specialists and project developers. Installation specialists profit here from the superior product quality of products manufactured in Taiwan in accordance with the highest quality standards, as well as from the comprehensive consultation, planning and maintenance services from WINAICO. Generous stock levels ensure the rapid availability of WINAICO products.
