Press release 7/2013

PV module manufacturer WINAICO puts its solar panels to the test

Test field in the harsh conditions of outback Australia

Creglingen, 26.03.2013 – WINAICO, a subsidiary of Taiwan’s biggest photovoltaic module manufacturer Win Win Precision Technology Co., Ltd., has installed its polycrystalline solar panels amongst its competitors under the blazing Australian sun.

The Desert Knowledge Australia Solar Centre (DKASC) is an independent demonstration facility funded by the Australian Federal Government for commercialised solar technologies operating in the arid conditions of Alice Springs, Central Australia. The Solar Centre provides the industry with long term system level data proving the reliability of solar generators. A standard and automated metering system has established the performance data which is collected at a resolution that confirms the reliability of solar technologies and logs power quality. The [Solar Centre Website](#) explains the differences in the installed solar technologies, while the [Live System Information Page](#) displays the real-time generation data for each of the different installations.

“We expect our modules to excel at the testing facility due to their technological advances, low light performance and temperature coefficients. The initial results are coming through and they are extremely promising,” says Blair Pester, Sales Director Asia Pacific, WINAICO Australia.

This fixed ground-mounted array features the latest generation of WINAICO polycrystalline modules, with excellent performance in low light conditions and higher ambient temperatures. Built on a fully-automated production line using the highest quality materials, WINAICO ensures that Potential Induced Degradation (PID) and Light Induced Degradation (LID) are minimised. Positive tolerances on every

module sold ensures that each system generates the more power all year round, even when conditions are not ideal.

WINAICO – Manufacturer and system supplier

As a 100% subsidiary of the semiconductor company Win Win Precision Technology Co., Ltd., based in Taiwan, WINAICO manufactures and distributes crystalline high performance modules worldwide. Furthermore, as a systems house for photovoltaics, WINAICO delivers complete PV system packages.

Company customers are solar specialists, solar technologists, installation specialists and project developers. Installation specialists profit here from the superior product quality of products manufactured in Taiwan in accordance with the highest quality standards, as well as from the comprehensive consultation, planning and maintenance services from WINAICO. Generous stock levels ensure the rapid availability of WINAICO products.
