WINAICO triumphs in Desert Knowledge testing facility

Great results in both laboratory and in real world conditions

Creglingen, 08.08.2013 – PV module manufacturer WINAICO's focus on perfection has proven to make their modules one of the most efficient currently on the market, as shown in real world conditions by their performance at the Desert Knowledge Australia Solar Centre demonstration facility. Sitting in the harsh conditions of the Australian outback, the Solar Centre in Alice Springs is an independent demonstration facility that compares the solar panel performance of leading manufacturers with real time results.

WINAICO's assessment of the publicly available data from the Solar Centre indicate that their panels are more efficient than some of their competitors' by up to 12 %, meaning that each panel produces a higher yield for better value.

"It comes as no surprise that WINAICO's panels have performed so well in these tests as the panels are manufactured on a completely automated system", says Sascha Rossmann, Vice President of Global Sales at WINAICO. Each module undergoes electroluminescence testing, flash testing and many other automated tests throughout the production process resulting in maximum performance. With its strong technical background, WINAICO focuses on performance in real world conditions, refining production processes and component selection to get the highest yield.

This thirst to create the very best quality modules with the highest output possible has led to great results in both laboratory and in real world conditions ensuring customers' expectations are exceeded.

WINAICO – Manufacturer and system supplier

As a 100% subsidiary of the semiconductor company Win Win Precision Technology Co., Ltd., based in Taiwan, WINAICO manufactures and distributes crystalline high performance modules worldwide. Furthermore, as a systems house for photovoltaics, WINAICO delivers complete PV system packages.

Company customers are solar specialists, solar technologists, installation specialists and project developers. Installation specialists profit here from the superior product quality of products manufactured in Taiwan in accordance with the highest quality standards, as well as from the comprehensive consultation, planning and maintenance services from WINAICO. Generous stock levels ensure the rapid availability of WINAICO products.
