Press release 7/2012

WINAICO presents intelligent storage solutions and the new 255 Watt mono module at Intersolar 2012

The WSP-255M6 impresses not only due to quality but also with elegant aesthetics

Creglingen, 4th June 2012 – At this year's Intersolar, the largest solar trade fair in the world, WINAICO is set to present its new **monocrystalline photovoltaic module with completely black design**. "Due to the increased demand for high performance modules with first-class aesthetics we decided to modify our previous monocrystalline module range, **whilst simultaneously succeeding in further improving the value for money**" according to Sascha Rossmann, Director Sales & Marketing at WINAICO. In the future the module will be available with a nominal output of 250 W and 255 W.

Further highlights set for presentation at the WINAICO stand are **two storage solutions for use with existing systems and new installations**.

The **PowerRouter from Nedap constitutes an optimum solution for new systems**. Inverter and integrated battery manager for optimisation for personal use are combined within a single device here. It is possible to utilise power produced from the sun both day and night via the integrated battery: Power generated during the daytime is stored and is therefore available for personal consumption by the user at any time. Using the PowerRouter it is possible to utilise up to 70% of solar power for personal consumption purposes, and all this with just a single device. Furthermore, the product has also been **nominated for the Intersolar AWARD 2012**.

WINAICO presents the **PLATINUM solar battery from Diehl AKO for retrofitting to existing systems**. Thanks to ultramodern lithium rechargeable technology, the many times proven solar battery has a service life of 25 years. The solar battery is essentially compatible with all photovoltaic systems.

Both devices will be available from WINAICO in the future.

Visit the Intersolar in Munich from the 13th-15th June 2012. The WINAICO stand is in Hall A2.370. We look forward to seeing you there!

WINAICO Deutschland GmbH – Manufacturer and system supplier

As 100% subsidiary of the semiconductor company Win Win Precision Technology Co., Ltd., based in Taiwan, WINAICO manufactures and distributes crystalline high performance modules worldwide. Furthermore, as systems house for photovoltaics, WINAICO Deutschland GmbH delivers complete PV system packages.

Company customers are solar specialists, solar technologists, installation specialists and project developers. Installation specialists profit here from the superior product quality of products manufactured in Taiwan in accordance with the highest quality standards, as well as from the comprehensive consultation, planning and maintenance services from WINAICO Deutschland GmbH. Generous stock levels in Germany ensure the rapid availability of WINAICO products throughout Europe.
