Press Release

WINAICO presents two product innovations at the Intersolar

New module from the WSP range and flat roof system WINAICO Simplest

Creglingen, 23.05.2011 – WINAICO Deutschland GmbH, subsidiary company of the Taiwanese module manufacturer Win Win Precision Technology Co., Ltd., is simultaneously presenting two product innovations at the Intersolar in Munich.

The company has expanded the WSP range to include a 260W module. Through the use of the 3-bus-bar technology the monocrystalline module WSP-260M6 is able to attain a high output of 260W. Each equipped with 60 ultra-efficient monocrystalline 156 x 156 mm solar cells, the modules attain superb energy yields due to the use of high quality semiconductor silicon. WINAICO provides a product guarantee on all modules from the WSP range of 10 years, as well as a performance guarantee of 25 years. Two years of insurance protection is also included with the purchase of the WINAICO modules. It is possible to extend this to a total of ten years under economical conditions.

Additionally, WINAICO is also presenting the innovative flat roof system WINAICO Simplest for the first time. The system, produced in aluminium, is ideal for flat roofs with minimal load-bearing capacities or large span widths. Just one tool is required for the complete system installation. This enables extremely simple and rapid installation. With cut-outs such as skylights or ventilation grills it is possible to individually tailored the subframe. Simplest is suitable for roofs with angles of up to 4 degrees. With severe angles the installation of an anti-slip device is required. Up to wind load zone 3 inland and a building height of 25 metres no increased loading is required. The system is available in combination with the high performance modules from the WSP range. With row spacing of 40cm the WSP-230P6 modules

achieve a loading of 15kg/m² and with a 10° elevation outputs of 100 W/m². This means up to 44% greater output per square metre than a south-facing PV system elevated 15°. The system comes with a 5-year product guarantee. The WINAICO stand at the Intersolar is located in hall A4, stand 270.

WINAICO Deutschland GmbH - manufacturer and system supplier

As a system house for renewable energies, focusing on photovoltaic technology, WINAICO Deutschland GmbH has specialised in solar energy: a subsidiary of manufacturer Win Win Precision Technology Co., Ltd., with headquarters in Taiwan, WINAICO is building on the comprehensive expertise of its parent company in the exacting semiconductor industry. The main products of the company, based in the German town of Creglingen (Main-Tauber District), are crystalline high-performance photovoltaic modules and innovative LED lighting technology as well as premium-quality thin-film modules, sold exclusively to European installation companies. Installers benefit both from the above-average product quality of the products, manufactured in Taiwan to the highest quality standards, and from the comprehensive advice, planning and service provision of WINAICO Deutschland GmbH. Ample stocks in Germany ensure the rapid availability of WINAICO products throughout Europe.
