Press announcement

Win Win Precision Technology Co. Ltd. receives the MCS certificate for the British solar market for its WINAICO solar modules

Creglingen, 14. January 2011 – Win Win Precision Technology Co. Ltd., a leading manufacturer of crystalline solar modules, has received the MCS certificate for its mono and polycrystalline WINAICO WSP module series.

The certificate, awarded under the so-called Microgeneration Certification Scheme (MCS), certifies all the eligibility conditions for sale in Great Britain as well as the high quality of WINAICO module production.

The certification was given by the British Approvals Board for Telecommunications (BABT) in collaboration with TÜV Süd [Technical Monitoring Association - South]. The British seal of quality is an internationally recognised and independent certificate awarded for particular product quality and safety. As part of the certification process, besides strict product tests the production facilities themselves were also inspected and certified. The MCS approval procedure includes a plant inspection to ensure that all production processes comply with safety and reliability standards as well as a thorough performance appraisal of the product.

Sascha Roßmann, director of the German branch of the company, explains: “In terms of the strengthening of our business in Europa the MCS certification takes us a major step forward. The British solar market offers great potential and in future we look forward to being able to supply British installers too with the excellent WINAICO modules”. State-of-the-art quality management, from incoming goods inspection via the complete value-added chain through to a 100% visual, micro-optic, mechanical and electrical pre-delivery inspection, continuously safeguard the premium quality of WINAICO products and thus offer a high degree of investment security. In addition to the MCS

certification, WINAICO products are certified in accordance with IEC 61215 and EN 61730.

WINAICO Deutschland GmbH - your on-site manufacturer and system supplier

As a system house for renewable energies, focusing on photovoltaic technology, WINAICO Deutschland GmbH has specialised in solar energy: a subsidiary of manufacturer Win Win Precision Technology Co., Ltd., with headquarters in Taiwan, WINAICO is building on the comprehensive expertise of its parent company in the exacting semiconductor industry. The main products of the company, based in the German town of Creglingen (Main-Tauber District), are crystalline high-performance photovoltaic modules and innovative LED lighting technology as well as premium-quality thin-film modules, sold exclusively to European installation companies. Installers benefit both from the above-average product quality of the products, manufactured in Taiwan to the highest quality standards, and from the comprehensive advice, planning and service provision of WINAICO Deutschland GmbH. Ample stocks in Germany ensure the rapid availability of WINAICO products throughout Europe.
