Press release 1/2017

## **2,2 MW WINAICO solar modules replace damaged thin film modules**

*Ground mounted PV system on former ammunition depot of Federal Armed Forces completely new installed*

Creglingen, 05.01.2017 – WINAICO, a subsidiary of Taiwan’s biggest solar module manufacturer Win Win Precision Technology Co, Ltd., was chosen by PV Conception GmbH from Germany (acting on behalf of a project company founded by the Danish Momentum Group in Roskilde) to be module supplier for a 2,2 MWp photovoltaic system on the area of a former ammunition depot of the Federal Armed Forces in Lower Saxon Wittmund. Before the high-performance modules of WINAICO were installed, more than 22.000 damaged amorphous silicon modules from a Chinese manufacturer had to be removed.

The system size with more than 22.000 thin film modules was 2,2 MWp, while the newly installed more than 8.500 WINAICO solar modules generate 2,2 MWp as well. The module type installed is WINAICO’s polycrystalline project module WST-206P6 with 260 Wp. The time for completion came to six weeks.

“The fact that all the Chinese thin film modules were damaged and had to be replaced is no good publicity for photovoltaics. The more important it is to select high-quality solar modules for the replacement. It was quickly becoming clear that we place the order with WINAICO. We have a strong and longtime partnership with WINAICO and are very positive about the quality of their modules. Not only our experience with WINAICO in the processing of orders, but also the excellent performance data of WINAICO’s solar modules made us reach this decision“, said Kim Radermacher, Managing Director of PV Conception GmbH.

## **PV-Conception GmbH**

With many years of experience, a clear vision and high quality standards, PV Conception GmbH is implementing energy concepts throughout Germany. With their focus on quality, know-how and sustainability, they have realised a number of large-scale projects in the past few years and have actively contributed to the energy revolution. Managing Director Kim Radermacher and his team are aware of the variety of photovoltaic plants and therefore offer a complete service from a single source, a photovoltaic full service. Joint planning is the way to optimum plants and to the use of your solar potential. PV Conception GmbH makes the planning process reality-oriented. We work closely with an extensive network of installers, electricians, architects and operators in order to be able to offer the performance portfolio permanently and at any time. Here you profit from the incomparable spectrum of professional know-how, practical experience and innovative technology.

## **Momentum Gruppen A/S**

Momentum Gruppen A/S is specialized in managing solar and wind turbine projects in Europe, primarily in Germany, Denmark, France, Great Britain and Sweden.

Momentum Gruppen A/S manages roughly 400 wind turbines with an installed capacity of 565 MW and 6 solar farms with an installed power of more than 15 MW, which makes Momentum one of the largest independent asset managers in Denmark. Apart from providing asset management, Momentum also offers brokerage services (purchase and sale) of wind- and solar projects and services regarding repowering.

## **WINAICO – Manufacturer and system supplier**

As a 100% subsidiary of the semiconductor company Win Win Precision Technology Co., Ltd., based in Taiwan, WINAICO manufactures and distributes crystalline high performance modules worldwide. Furthermore, as a system house for photovoltaics, WINAICO delivers complete PV system packages.

Company customers are solar specialists, solar technologists, installation specialists and project developers. They profit from the superior product quality of products manufactured in Taiwan in accordance with the highest quality standards, as well as from the comprehensive consultation, planning and maintenance services from WINAICO. Generous stock levels ensure the rapid availability of WINAICO products.
